BLACK OIL SUNFLOWER

See more birds. The key to attracting colorful birds to your backyard habitat is providing the proper food they desire. Black Oil Sunflower has tested to be the most popular single ingredient for feeding wild birds. This was seen in a test known as PROJECT WILDBIRD®. It was conducted by the Wild Bird Feeding Industry from 2005 to 2008.

It is important to remember that most seed eating birds have specific preferences. You can draw more birds by adding other Lyric products such as Lyric Supreme or Lyric Delite to your feeding plan.

Lyric Black Oil Sunflower will attract and feed these colorful songbirds:

Cardinals

Chickadees

Doves

Finches

Flickers

Grosbeaks

Nuthatches

Redpolls

**Red-Winged
Blackbirds**

Sparrows

Titmice

Towhees

Woodpeckers

And more!

The Finest Nutrients. See The Difference. All Lyric wild bird foods are carefully selected for nutritional content, cleanliness and quality. Proteins and fats are important to fuel wild birds' high level of daily activity. Whether it's foraging for food in the winter or energy for spring nest building, you can trust Lyric to provide your backyard birds with all-natural, quality foods.

Choosing feeders. Lyric Black Oil Sunflower can be used in most feeders. Tube, hopper or open-tray platform feeders can all serve as sources for wild birds to visit for this food. Cardinals and others will also look for sunflower seeds on the ground. If you want to keep non-bird visitors from eating this food, try to hang feeder bottoms at least 4-ft. above the ground and away from climbing sources.

Ingredients: Black Oil Sunflower Seeds for wild birds.

Guaranteed Analysis:

Crude Protein (min.): 10.0%
Crude Fat (min.): 26.0%
Crude Fiber (max.): 32.0%
Moisture (max.): 12.0%

Packaged to keep it fresh!

STAYFRESH TECHNOLOGY INSIDE

This bag contains an oxygen scavenger packet to help keep the food fresh. Please discard the packet, its contents are not edible.
